BHANUPRAKASH BANDA

LinkedIn ● Portfolio ● 219.900.4554 ● bandabhanu1098@gmail.com ● Chicago, IL

SUMMARY OF QUALIFICATIONS:

- Experience leading automation and AI-driven projects in addition to presenting research at industry conferences
- Strong expertise in machine learning, data analytics, and AI-driven automation, with hands-on experience in TensorFlow, PyTorch, and cloud platforms (AWS, Azure)
- Proficient in Python, Java, and SQL, with experience in developing scalable backend solutions, automation frameworks, and cloud-based workflows
- Strong background in data preprocessing, feature engineering, and visualization

TECHNICAL EXPERTISE:

CERTIFICATIONS:

- Microsoft Certified Azure Fundamentals

PROGRAMMING LANGUAGES:

- C, Java, Python, SQL, Javascript

WEB DEVELOPMENT:

- HTML, HTML5, CSS, Javascript, node.js

CLOUD COMPUTING:

- AWS IoT Core, S3, EC2, Kinesis, SageMaker AI, Aws Lambda, Rekognition, Azure IoT, Azure Digital Twin

LIBRARIES:

- Pandas, SciPy, MatPlotLib, NumPy, Scikit Learn, NLTK, Keras, TensorFlow, Seaborn, PyTorch

TOOLS:

- Selenium, Rest assured, Appium, Postman, TestNG, Cucumber, Jira, Playwright, Tableau, Power BI

EMERGING TECHNOLOGIES:

- Augmented reality, Virtual reality, Metaverse, Digital twin, Robotics, Computer vision, Artificial Intelligence

EDUCATION:

Master of Science in Computer Science — Expected: May 2025
Lewis University, Romeoville, IL — GPA: 3.93/4.0
Concentration: Artificial Intelligence
Capstone Research Project:
JobHarvest: Intelligent Job Scraping for Efficient Job Search

Bachelor of Technology — July 2021
G. Pulla Reddy Engineering College, Kurnool, India — GPA: 9.05/10
Majors: Mechanical Engineering

WORK EXPERIENCE:

Programmer Analyst — September 2021 – July 2023
Cognizant Technology Solutions, Hyderabad, India

- Spearheaded collaborative efforts with the emerging technologies R&D team to develop and implement cutting-edge solutions, increasing client satisfaction by 40%
- Elevated automation coverage by 35% by designing and deploying modular frameworks, ensuring compatibility across robot SDKs and improving testing precision and reliability
- Engineered automated test scripts using Python, Selenium, Cucumber BDD, and TestNG, improving test coverage by 35%, regression testing accuracy by 20%, and overall efficiency by 25%
- Reduced deployment times by 30% by implementing CI/CD pipelines, streamlining software releases
- Ensured API functionality and reliability for RESTful microservices and drone systems by executing automated tests, achieving 99.9% data integrity and seamless data transmission
- Designed a cross-platform testing strategy and scalable test environment, increasing platform compatibility by 50%, supporting 20+ virtual devices, and expanding test reach by 20%
- Optimized drone data transmission and architected a cloud-integrated robotic test framework, reducing latency by 50%, improving reliability by 80%, and supporting scalable remote testing
- Pioneered AR/VR/MR testing, leveraging AI via AWS and Yolo for object detection, boosting user engagement and satisfaction by 40% through precise validation
- Enhanced object detection accuracy by 15% in AR/VR/MR environments, ensuring precise object placement and superior user interaction

- Reduced report generation time by 70% by automating the process and integrating detailed HTML reports, streamlining project transparency

PROJECTS:

JobHarvest: Intelligent Job Scraping for Efficient Job Search: Project at Lewis University

- An intelligent job scraping tool that automates job searches across 5+ job portals, extracting and organizing 10,000+ job listings efficiently using Python, Selenium, and Pandas

Innovative Machine Learning Techniques for Obesity Prediction: Project at Lewis University

- Developed a machine learning model using Gradient Boosting, achieving 96.22% accuracy in obesity prediction by optimizing data preprocessing and feature engineering on the UCI dataset

Enhancing Image Classification: Personal Project

- Engineered and deployed sophisticated CNN, RNN, and ResNet architectures for a multifaceted image classification task across diverse datasets, achieving 93% accuracy

HONORS, ACTIVITIES, AND VOLUNTEER EXPERIENCE:

- Rising Star Award, Cognizant Technology Solutions, April 2022
- Presented "Accelerating Enterprise Drone Integration" at the Annual Software Testing Conference, Pune, India, December 2022
- Member, Coders Club, G. Pulla Reddy Engineering College, 2018 – 2021
